

What systems can you test?

Last Updated Tuesday, 12 August 2008 09:42

XTech Gear has configured and setup and a wide range of communications systems to enable us to provide testing not only for our own inventory, but to certify that repairs are properly made and to provide a testing service to our customers.

We are able to test and repair a multitude of Central office and Data Networking equipment. We are constantly in the process of turning up new systems, to better provide our customers with the level of service that they require.

Please refer to our [Repair Services Page](#) for a current snapshot of systems that are currently incorporated into our testing and repair process.

If you find a system not listed that you require testing services for, please feel free to [contact one of our representatives](#)

This e-mail address is being protected from spam bots, you need JavaScript enabled to view it to discuss your needs. We are more than willing to work with you, and initialise any systems and test procedures that you require.
